

Enhanced Anti-spam Service

Do not let YOUR computer get overloaded with SPAM!

CanIt is the most powerful server-side anti-spam solution available. It provides complete control of the e-mail environment and one-stop administrative convenience for all spam management activities.

The CanIt-PRO Anti-Spam Solution

CanIt-PRO™ is the industry-leading enterprise anti-spam solution that offers unparalleled flexibility and end-user control while effectively stopping spam at the mail server - never discarding a valid e-mail message. Stopping 98% of spam at the server, CanIt-PRO never discards a valid message. Its flexibility lets you tailor the solution to fit your needs and your environment.

OTHER FEATURES INCLUDE:

- CanIt Automatic Update Service ensures you have the most up-to-date spam and virus definitions.
- Spam Detection includes a variety of techniques including keyword search, header analysis, message format analysis, per-user Bayesian statistical analysis, blacklists, whitelists, greylists, open proxy lists, DNS verification, SpamAssassin™ content-filtering rules, sender policy framework (SPF) and more.
- Optional outbound scanning feature filters outgoing messages at no extra charge.
- Tailor the user interface to meet the needs of both novices and experts.
- CanIt uses words and word pairs to train the system to recognize spam/non-spam.
