

Hosted BlackBerry Enterprise Server Gives Your Small or Medium-Sized Business the Wireless Advantage

Hosted BlackBerry Enterprise Server does not require you to buy, install or manage server software, removing the need for any upfront software costs, deployment overhead or ongoing IT support costs. It offers you the security and functionality of the BlackBerry Enterprise Solution™ through fully outsourced versions of BlackBerry Enterprise Server™: Hosted BlackBerry Enterprise Server is available through hosters, including wireless carriers and solution providers. Getting started is as simple as choosing the Hosted BlackBerry Enterprise Server option from your hosting service provider's list of offerings.

BlackBerry Advantages for Your Business

Get ahead and stay competitive with affordable wireless capabilities.

Take advantage of proven BlackBerry technology, with no deployment overhead and without having to pay for software or on-going IT support.

BlackBerry isn't just for larger businesses. Outsourcing your wireless functionality with Hosted BlackBerry Enterprise Server eliminates traditional resource and cost barriers and makes the most of your business' finite resources.

Convenient pricing from the suppliers you trust. Purchase Hosted BlackBerry Enterprise Server through the partner that knows you best, whether it's your wireless carrier or your preferred solution provider.

Grow and differentiate your business. Hosted BlackBerry Enterprise Server allows you to maintain multiple channels of communication with customers, increasing points of contact, immediacy of responses and your ability to keep customers satisfied.

Take your office out of the building. Stay close to your business and your customers, whether you are in a client meeting across town, traveling on business or taking your kids to their soccer game.
