Manage Your Company's Documents

Enjoy all the benefits of a Microsoft SharePoint®-based, document-management system.

Manage folders, sub-folders, and accessibility through an intuitive interface.

Automate Your Company's Sales Force

Manage every potential source of revenue from leads, through opportunities, to signing deals, with an easy-to-use solution. At any point you will be able to see the status of any deal.

Manage How Your Company Delivers

When a deal is signed, make it a project. Assign milestones to the project, assign tasks to milestones, and manage it all through your Project Management Dashboard.

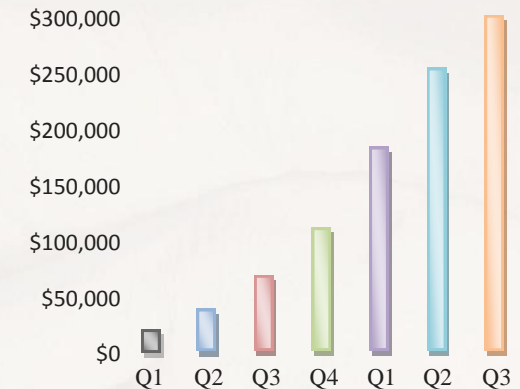

Manage Your Customer Care

Taking care of customers is taking care of business! Track customer issues, assign them to the people within your company who are authorized and qualified to meet these challenges, and more importantly, track how they are being handled.

Empower Your Business

Any job is easier if it is done with the right tools. Empower your business with the tools it needs to grow. The Business Portal integrates the work that must get done from managing leads, to opportunities, to signing deals, to projects, to on-going customer service. It offers the features and benefits of enterprise computing to businesses at a price they can easily afford. All powered by an infrastructure with the same robust design large companies have enjoyed for many years.

SALES ANALYSIS
